

## One-Day Workshop

# True Colors

## Keys to Successful Teambuilding

for All Team Members in Education, Government,  
Non-Profit and Business Organizations

Each organization, whether it is a corporation, school, hospital, government agency, military or non-profit, requires teams of people working together to accomplish their goals. Each team best utilizes the talents and resources of its participants. True Colors provides an ideal method for choosing, mixing and motivating the team members, so that they will perform at their best in an interactive, supportive, creative, and responsible manner.

In the True Colors Teambuilding Workshop, you will learn how to work with different personality types and how to use their strengths and interests to best set up teams that efficiently handle projects, activate sales, produce products and services, interact with customers, manage and maintain their departments and the organization as a whole. **This hands-on, interactive workshop provides opportunity for those who have previously completed the True Colors Personal Success Workshop to expand and follow up in the area of Teambuilding.**

Whether existing or newly formed, team members learn how to bring out the best in each other, how each member's primary color – and a representation of all colors – is important to the team's success, and how to bring up your paler colors for the benefit of the team's goals.

### Key Benefits Include:

- Learn to choose members of a team using True Colors as your guide to different personality types, being able to recognize how they will contribute their talents and abilities
- Participants will understand key concepts of teambuilding
- Participants will understand how to work with members of their team collaboratively
